About i9

1. i9 Publication Hub

i9 is a little publication hub with big plans.

We are putting together the best tools to make an open, peer reviewed publication platform. We follow the principles of:

- Reproducible Research
- Open Collaboration - in real time
- Automatic Formatting in HTML and PDF - just write in markdown
- A unique micro-peer-review system

We're working on an open source project to bring some fantastic tools together in one easy-to-use pipeline, from collaborative writing of papers, to peer review and publication.

Along the journey, we will be contributing to the following projects:

- [Hedgedoc]
- [Quarto]
- [Rstudio]
- [Sharelatex]

We will also be filling in the gaps with some new project code:

- [Commenting System]
- [Micro-peer-review System]
